Most of the fields are filled in for you. The two fields you need to fill in are the username (your email address) and a password. You will see STUDENT in the first field (I'm a..) if you are a parent/guardian.

The system emails you by default at 6:45am with a link to the daily screening. **If you would like to have a text message sent to you as well, you need to edit your profile and add your cell phone number (see page 2)**

After you have logged in, click SETTINGS and then MY PROFILE. Enter your cell phone number in the correct field and click SAVE at the bottom.

When you log in you will see the following:

The screenshot shows a user interface with a purple background. At the top, it says "Your Name Here" in white. Below that is "Entry Pass Status" in white. In the center, there is a large yellow box with the word "EXPIRED" in black. Below the box, it says "Expired" and "December 03, 2020 11:59 PM" in white. At the bottom, there are four buttons: "New Health Screener", "Show Entry Pass", "2-Way Chat", and "Upload Files".

- **Expired:** This means the entry pass from the day before is no longer valid and you have to submit a new health screener.
- **DO NOT ENTER:** This will display if a person fails any of the questions in the screening.
- **Clear to Enter:** A user will see this if they have passed the screening.
- To take the day's screening click the **NEW HEALTH SCREENER** button.
- We will not be using the 2-way chat or upload files options.
